

# +1 プラス・ワンの答え

## 8 かけ算のしかたを考えよう

カ ① 60                      ② 400                      ③ 800                      ④ 3000

キ ① 64                      ② 63                      ③ 48                      ④ 44

ク ① 81                      ② 76                      ③ 98                      ④ 78  
      ⑤ 90                      ⑤ 75                      ⑥ 90                      ⑦ 96

ケ ① 248                      ② 159                      ③ 188                      ④ 205

コ ① 252                      ② 332                      ③ 413                      ④ 204

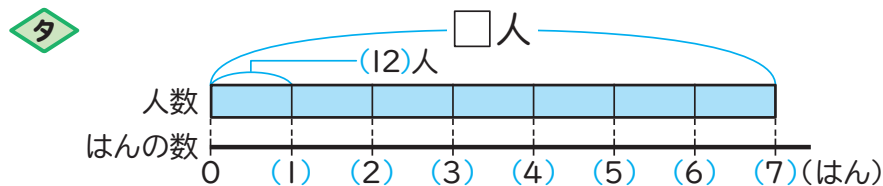

サ ① 286                      ② 426                      ③ 993                      ④ 888

シ ① 804                      ② 988                      ③ 5067                      ④ 1358

ス ① 1228                      ② 2706                      ③ 5640                      ④ 2000

セ ① 480                      ② 4680                      ③ 4836

ソ ① 1つ分の大きさ…150(mL)    いくつ分…6(人)  
      ②  $150 \times 6 = 900$     900mL

$12 \times 7 = 84$     84人
